

PURE DROP - WEBSITE FINAL UPDATE CHECKLIST

Developer handover | Pure Drop Building Cleaning Services LLC | Dubai, UAE
Goal: authentic website, easy booking, strong local SEO and Google Ads readiness

A. AUTHENTICITY, TRUST & CONTENT

1. **Replace weak/unverified statistics.** Review figures such as 1+ Years Experience, 10+ Happy Clients, 15+ Expert Cleaners and 98% Satisfaction. Use only accurate, supportable figures; otherwise remove the statistics section.
2. **Use real Pure Drop staff photos.** Add our actual uniformed team to the homepage/About Us and use consistent individual portraits where suitable. Keep original faces/appearance; avoid generic or AI-looking staff.
3. **Create a real Before & After gallery.** Add a section titled **See the Pure Drop Difference**, ready for our real job photos. Suggested filters: Deep Cleaning, Kitchen, Bathroom, Sofa, Carpet, Move-In/Move-Out and Villa Cleaning. Do not present AI images as real work.
4. **Use genuine Google reviews only.** Display real reviews and link 'See All Google Reviews' to our actual Google Business Profile. Remove sample/invented testimonials.
5. **Review marketing claims.** Keep claims such as background-checked/certified staff, 100% guarantee, free re-cleaning, eco-friendly products, allergen/dust-mite removal, etc. only if they are genuinely provided and supportable. Safer wording: Trained Cleaning Professionals / Customer Satisfaction Focused / Professional Cleaning Materials.

B. BOOKING, PRICING & CUSTOMER EXPERIENCE

6. **Make booking consistent on every service page.** Keep Book Now / WhatsApp / Get Free Quote highly visible. WhatsApp should use +971 56 217 0386 and preferably pre-fill: Name, Service, Location, Preferred Date/Time and Property Size/Hours.
7. **Improve the enquiry/quotation form.** Collect Name, Mobile/WhatsApp, Area, Service, Property Type, Bedrooms (where relevant), Preferred Date/Time, With/Without Materials and Notes. For deep cleaning, add photo/video upload if technically possible.
8. **Make pricing easy to understand.** Clearly show Regular Cleaning - With Materials / Without Materials, recurring packages and quotation-based deep cleaning. Sofa/carpet/mattress pricing can be separate. Use 'Starting From' where condition/property size affects price.
9. **Audit every service inclusion.** Do not automatically list floor polishing, outdoor areas, upholstery, high-reach/exterior windows, specialist equipment, etc. unless included in the standard service. Mark optional items as 'Available on request / additional service'.
10. **Confirm customer-facing business hours.** Operations are normally 8:00 AM-7:30 PM and Monday is staff weekly off. Confirm the final public business/support hours with us before publishing; customer-support hours do not have to equal staff duty hours.

C. AREAS WE SERVE & LOCAL SEO

11. **Expand and optimize Areas We Serve.** Use correct community names and natural local SEO content. Avoid duplicate IMPZ because it is now Dubai Production City.
12. **Areas to include:** Nad Al Sheba 1, 2, 3 & 4; International City; Dubai Silicon Oasis; Liwan; Dubailand; Falcon City of Wonders; Warsan 4; The Villa; Villanova; Tilal Al Ghaf; Dubai Sports City; Motor City; Dubai Studio City; Arabian Ranches 1, 2 & 3; Dubai Production City; DAMAC Hills; Mudon; Serena; Rukan; Layan; The Sustainable City; Al Waha; Arjan; Al Barari; Al Warqa; Mirdif; Sobha Hartland; Dubai Creek Harbour; California Village; Business Bay. Confirm the exact 'Lagoon Community' before publishing.
13. **Optimize key service pages for Google search.** Target natural terms such as Cleaning Services Dubai, Deep Cleaning Dubai, Maid Services Dubai, Villa Deep Cleaning Dubai, Apartment Deep Cleaning Dubai, Sofa Cleaning Dubai, Carpet Cleaning Dubai, Office Cleaning Dubai, Move-In Cleaning Dubai and Move-Out Cleaning Dubai. Optimize title tags, meta descriptions, H1s, URLs and image ALT text without keyword stuffing.

D. BRANDING, MOBILE & GOOGLE ADS READINESS

14. **Keep branding consistent.** Use Pure Drop blue/yellow branding and the correct legal name: **Pure Drop Building Cleaning Services LLC**. The legal name should be clear in the footer, contact information and policy pages.
15. **Mobile optimization.** Test all pages on Android and iPhone. Ensure WhatsApp does not cover content, menus/forms work properly, text is readable, CTAs are easy to reach and staff/before-after images are compressed without becoming blurry.
16. **Google Ads conversion setup.** Track WhatsApp clicks, phone calls and quote-form submissions. Verify Google Analytics / Tag Manager and conversion events. Each ad should land on the most relevant service page, not automatically on the homepage.
17. **Technical/policy check before ads.** Confirm fast page loading, HTTPS, working Privacy Policy / Terms / Refund Policy, no broken links, correct contact details and no misleading/unverifiable content.

FINAL DIRECTION FOR THE WEBSITE

Real Team -> Real Work -> Before/After Results -> Real Google Reviews -> Clear Prices -> Easy WhatsApp Booking.

The site should feel like the real Pure Drop company rather than a generic cleaning template. Authenticity and easy booking are the main priorities.
